We are inviting you to participate in our Connected Care program. Our Connected Care program helps ensure that you receive the care you need when you need it, wherever you are and without extra trips into the office.

Medicare continues to encourage a strong partnership between patients and primary care providers. To that end, Medicare recently enhanced the Connected Care Program services available to beneficiaries with two or more chronic health conditions, including heart disease, COPD, dementia, asthma, cancer, diabetes, high blood pressure, Alzheimer's disease, high cholesterol, and depression.

We are excited to be able to provide these comprehensive care management services and contribute to better health outcomes, higher satisfaction for you, and live your healthiest life.

By taking advantage of your Connected Care Program benefits with LoCicero Medical Group, you will have:

- Personal case management, including a prepared checklist of your annual preventative services.
- Medication review services provided by our pharmacy technician and nursing staff.
- Nutritional and food planning guidance provided by our registered dietitian.
- Enhanced communication with our office, including secure electronic messaging.
- 24/7 access to our providers for urgent care needs

This service is covered by Medicare, coinsurance, other plans and typically has minimal to no out of pocket cost.

**I understand and would like to take advantage of these services.**
